Re: HMA Mix Verification for IAs

HMA Mix Design Verification results used for Independent Assurance testing.

The UDOT Qualification Committee has discussed allowing HMA Mix Design Verification as part of the Independent Assurance testing. As a result the following policy will apply:

- The technician must complete one successful split sample test
- The technician may then use HMA Mix Design Verification as part of the second IA. The technician would need to provide all test results for the Asphalt IA requirements, T30, T308, T166, T209 and T312.

Please contact me if you have any questions at (801) 965-4065.

Sincerely yours,

A handwritten signature in black ink that reads "Howard J. Anderson". The signature is written in a cursive style with a clear, legible font.

**Howard Anderson, P.E.
UDOT Quality Assurance Engineer**
